

## WED DESIGN (NLSC)

### QUESTION ONE

#### Item 1

You are an ICT learner at St Denis S.S Ssebugwawo. Recently, Mr. Milard Victor, the Director of ICT Connect Foundation (CBO), has approached you with an exciting project. He requests your assistance in designing a website for the CBO that will act as a virtual office to showcase the services delivered by the organization.

#### Task

Design a simple yet professional website with the following three pages:

1. **Home Page:** This page should provide a welcoming introduction to the organization, including a brief overview of its mission and vision.
2. **What We Do Page:** This page should detail the various services offered by the ICT Connect Foundation, along with any relevant projects or initiatives.
3. **Reach Us Page:** This page should include contact information, such as the organization's address, phone number, email, and a contact form for visitors to reach out directly.

To help you get started, you have access to a folder named **ICT Connect** on your desktop. This folder contains support files, including images, text documents with detailed descriptions of services, and contact information for the Reach Us page.
